Part III DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I. Claims 1-12 drawn to a wireless adaptor classified in Class 379, subclass 91.

Group II. Claims 13-49, drawn to financial transaction systems and a method of operating such systems, classified in Class 235, subclass 380.

Group III. Claims 50-59, drawn to a cryptographic method of data security, classified in Class 380, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II, are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination of Group II does not require the particulars of the subcombination Group I because any other wireless adaptor would be usable in the financial transaction system. The adaptor has separate utility to perform its stated functions for other applications.
- 3. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I and III have separate utility performing their individual functions in an unrelated manner. For example the method of securing data of Group III could be practiced without the use of a wireless adaptor. See M.P.E.P. § 806.05(d).
- 4. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions II and III have separate utility performing their individual functions in an unrelated manner. For example wireless financial transaction systems and method of Group II can be practiced without encryption. See M.P.E.P. § 806.05(d).
- 5. Because these inventions:
 - a. are distinct for the reasons given above,
 - b. have acquired separate status in the art because of their recognized divergent subject matter (Group I is directed toward the specifics of a wireless adaptor, Group II is drawn to the communications aspects of a financial transaction system and Group III is drawn to an encryption protocol for enhancing data security.),
- c. and require different searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Serial Number: 08/388,729

Art Unit: 2202

6. A telephone call was made to Michael J. Donohue on 9 April, 1996 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pinchus M. Laufer whose telephone number is (703) 306-4160. The examiner can normally be reached on weekdays from 7:30 am to 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. T. Tarcza, can be reached on (703) 306-4171. The fax phone number for this Group is (703) 306-4195.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 306-4177.
